

CREW CARE FLOOR FINISH REMOVER

DESCRIPTION

Drew Marine CREW CARE® Floor Finish Remover is an environmentally preferable* floor finish remover. CREW CARE Floor Finish Remover is used when the applied floor finish has reached the end of its useful lifecycle and is to be stripped and removed in preparation for a floor finish recoating. CREW CARE Floor Finish Remover sets a new standard in floor care because it supplements unrivaled environmental features with superior performance chemistry. Unlike conventional floor finish removers, CREW CARE Floor Finish Remover does not contain 2-BE (ethylene glycol butyl ether), APE (alkylphenol ethoxylate), Caustics, or EDTA (Ethylenediaminetetraacetic acid). However, like other conventional floor finish removers, CREW CARE Floor Finish Remover removes most conventional, metal cross-linked floor finishes. This fast-acting and pleasant-to-use stripper removes multiple layers of finish without the use of alkalis or other conventional, harsh components, and it does not contain hazardous or corrosive materials, which could end up in gray water discharge.

CREW CARE Floor Finish Remover is highly concentrated and requires no neutralization prior to floor finish being applied.

CREW CARE Floor Finish Remover is Green Seal™ certified** and is part of the CREW CARE line of environmentally and crew friendly products found in the Drew Marine CREW CARE Accommodation Cleaning Program. As part of an onboard environmentally preferable floor care program, it is recommended

This product meets Green Seal™ Standard GS-40 based on effective performance and protective limits on VOCs and human & environmental toxicity. GreenSeal.org.

CREW CARE Floor Finish Remover, CREW CARE Floor Finish, and CREW CARE Floor Finish Enhancer be the go to products for floor maintenance care on board. Procedures for a sustainable floor maintenance program can be found in the CREW CARE Step-by-Step Floor Maintenance Guide. A copy can be obtained from your Drew Marine Representative.

FEATURES

- EcoLogo Certified
- Phosphate free
- Readily biodegradable as defined in 40CFR796.3200
- Contains no:
 - Petroleum distillates
 - Halogenated Aromatic Solvents
 - Alkalis
 - MEA, 2-BE, Caustic, EDTA, Ammonia
- VOC Compliant (CARB)
- Fragrance Free
- Non-Corrosive (DOT)

BENEFITS

- Less irritating to crew than conventional floor finish removers
- Less handling and application issues than conventional floor finish removers
- Less impact on environment than conventional floor finish removers
- Does not contribute to toxins in gray water discharge
- Contributes to sustainability initiatives
- Cost effective stripper
- Minimal impact on indoor air quality compared to traditional floor finish removers

APPLICATION AND USE

Use 1:4 solution (100ml CREW CARE Floor Finish Remover to 400ml cold water).

Mop CREW CARE Floor Finish Remover solution onto the floor. Note: Best results are obtained by working in small areas, a section at a time. Recommend working sections should be no larger than 100 square feet/9 square meters.

Allow CREW CARE Floor Finish Remover to penetrate old floor finish for 5 minutes. Finish will begin to emulsify. NOTE: Do not let the solution remain in contact with flooring for longer than 5 minute intervals as tile or tile coloring can be permanently damaged. Do not use on asphalt tiles.

Scrub the area using a floor machine equipped with a suitable stripping pad, or scrub the floors manually with a suitable scrubber, such as a doodle bug with an attached swivel pad holder.

Pick up the solution with a vacuum or with a mop and bucket.

Mop rinse the floor two times with clean water, and allow the floor to dry completely.

After floor has been stripped according to these instructions, apply CREW CARE Floor Finish PCN 1AB4964 according to its directions.

As with any stripping operation, use extreme caution when walking on the floor while the Floor Finish Remover is in the process of removing the finish. The emulsified floor finish/ stripping mixture can be slippery.

Ensure adequate ventilation during use.

TYPICAL PHYSICAL PROPERTIES

Appearance	Clear, Yellow liquid
Odor:	Mild
pH:	10:8
VOC @ 1:4 dilution	1.63%

ORDERING INFORMATION AND PACKAGING

CREW CARE Floor Finish Remover comes in a case of 2 x 2.5 gallon (approximately 2 x 9.5L) containers.
