

CREW CARE FOOD HANDLERS HAND SOAP

DESCRIPTION

CREW CARE Food Handlers Hand Soap is a one-step hand cleaner, that contains a mild sanitizing cleaner and surfactants. CREW CARE Food Handlers Hand Soap is recommended for use in galleys or in hospitals to clean and sanitize hands. CREW CARE Food Handlers Hand Soap combines the gentleness of foam with the effectiveness of germ killers. It contains no fragrance that could adulterate food product. In order to prevent the spread of germs, CREW CARE Food Handlers Hand Soap is recommended for food crew who work in galleys.

According to International Health Regulations, 2005, Guide to Ship Sanitation, crew, who do not maintain an appropriate level of personal cleanliness, can transmit illness to others. Use of CREW CARE Food Handlers Hand Soap is recommended after handling raw food or any other contaminated material, where the contaminated material could result in the contamination of other food items. CREW CARE FOOD Handlers Hand Soap is recommended for use before handling prepared food. **CREW CARE Food Handlers Hand Soap must be rinsed with water after use.**

APPLICATION AND USE

CREW CARE Food Handlers Hand Soap is dispensed with CREW CARE Food Handlers Hand Soap Dispenser. The

dispenser dispenses 0.75 mL of rich foam per pump. With one pump, dispense the foaming product into hands, rub hands thoroughly for 30 seconds. Pay close attention to the areas between fingers and under nails to ensure they are also cleaned, as these areas typically harbor germs. Add water, lather, and rinse thoroughly.

It is recommended the dispensers filled with CREW CARE Food Handlers Hand Soap be located near sinks in galleys and in sanitary facilities used by food handlers when on duty. CREW CARE Food Handlers Hand Soap is also recommended for use in hospitals.
