# Lifejacket & Immersion suit Chest (SOS510)

### Typical use:

For the storage of foam filled Lifejackets or immersion suits. Widely used on commercial vessels and ideal for storage for ships undergoing sea trials as the chests are easy to move and transport.

### Description:

These chests are manufactured using UV stabilised polyethylene in a 4-5mm single skin. This makes them far more durable than alternatives made with thin double skins. The unique lid design with the marine bungy cord closure achieve an excellent IP rating of X5 so the contents will remain dry. The hinges are 316 Stainless steel and have proved to be 100% reliable. The cabinet base is reinforced for mounting to the deck.

The chests can be stacked up to 8 high to minimise freight and storage costs. Jo Bird keep on hand stock to achieve a very short lead time of no more than a few days from receipt of order.

### Standard specification:

Dimensions (mm)

Height x width x depth: 737 x 1030 x 982

Weight Kg: 27.5Kg

### Material specification:

Colour: Orange

Material: Body

UV stabilised Polyethylene

Hinge: 316 Stainless steel
