Sierra SDO double sided. The professional stepladder for the handyman and professional

The Sierra is a robust, professional stepladder. It can be used on both sides. Ideal for the slightly heavier jobs at home or for professional projects. Despite the robust design the stepladder is lightweight due to the open step profile.

The solid step feet offer the necessary stability. Moreover, the antiskid profile makes sure you do not slip. The Sierra is a professional stepladder with an open step profile. The stepladder is consequently extremely lightweight. The treads are attached by means of blind rivets. As a consequence they can quickly be replaced should this be required.

SIERRA DOUBLE SIDED - aluminium stepladder
