

Altrex Taurus TDO

A double-sided aluminium stepladder for intensive maintenance and installation work. Access from either side reduces repositioning, while robust double box-profile treads and a dirt-resistant finish suit frequent professional use.

Features

- Double-sided access and large anti-slip feet
- Selected versions with folding safety guardrail
- Replaceable riveted treads

Selected configurations

Number of Treads	Article number	Maximum standing height	Max Working Height	Storage height	Weight
3	192603	0.71 m	2.7 m	77.5 cm	7.9 kg
4	192604	0.95 m	2.95 m	102.5 cm	9.4 kg
5	192605	1.2 m	3.2 m	127.5 cm	11 kg
6	192606	1.42 m	3.4 m	152.5 cm	12.6 kg
7	192607	1.65 m	3.65 m	177.5 cm	14.7 kg
8	192608	1.89 m	3.9 m	202.5 cm	16.4 kg
10	192610	2.35 m	4.35 m	252.5 cm	20.2 kg
12	192612	2.83 m	4.8 m	302.5 cm	24.3 kg

The selected 3 to 12 tread versions include a folding guardrail and self-locking metal spread protection. The hinge arrangement helps protect fingers when folding. Versions without a guardrail can be quoted separately.

Safety and quality

Altrex designs professional access equipment with a focus on safety, durable materials and working comfort. Taurus professional stepladders comply with EN 131 and NEN 2484.

Follow the supplied instructions and assess the working location. Working height is approximate reach height, not platform height. Tower assembly, stabilisers and permitted indoor/outdoor heights depend on the complete configuration.
